Sohar

Salalah

Products & Specifications

Primary Materials (UAE & Oman)

Gabbro (Heavy & Light)

0–5 mm, 5–10 mm, 10–20 mm, 20–40 mm, 0–60 mm, road base, sub-base, crushed sand, and armour rock (quarry run and graded classes)

Limestone

Steel-grade & cement-grade; screened/washed selections

Additional Materials

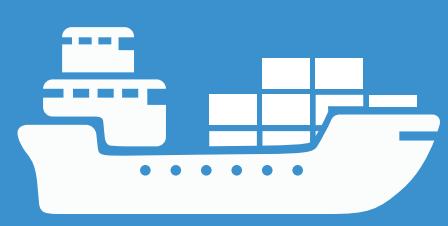

Dolomite & Natural Gypsum, Cement Clinker (as required)

Quality Management

- Third-party testing packs on request (gradation, LA abrasion, soundness, chemistry where applicable)
- Lot-based traceability from quarry to vessel

Delivery Models

Delivered-to-Site

UAE/GCC: Turnkey inland logistics and on-time gate deliveries

FOB

Fujairah/Dibba: Loading, port handling, and export documentation

CIF

Competitive freight programs and marine insurance to named ports

Strategic Footprint & Logistics

- **Dibba Port yard:** Stockpiling, testing, load-on Coordinated inland haul, stevedoring, cargo documentation and sailing schedules
- **Port of Fujairah yard:** deep backlog resilience, multi-berth optionality
- Coordinated inland haul, stevedoring, cargo documentation, and sailing schedules

Prime Quarry Crusher

In 2025, Prime Rocks & EMC acquired Prime Quarry Crusher, located in Al Hayl, Fujairah.

This acquisition strengthened the company's technical and managerial capabilities, reinforcing its commitment to quality, efficiency, and reliable supply across the UAE and GCC markets.

Why it matters:

Dedicated capacity aligned to export windows, tighter quality control and faster response to large RFQs, especially for marine and infrastructure programs.

Group Synergies

Marine Works & Earthmoving

- Proven marine contractor with 40+ million tonnes placed in under 2 years
- Experience spanning reclamation, coastal protection, artificial islands, breakwaters, causeways, jetties and quay walls
- Integrated engineering and execution capabilities
- Strong track record of maintaining critical-path schedules and delivering on time

Drilling & Blasting

- In-house drilling and blasting ensuring consistent fragmentation, safety, and schedule control
- ISO-certified QHSE system supporting safe and reliable operations
- MAS provides services to both Prime Rocks assets and third-party quarries across the UAE

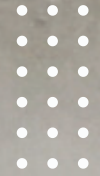

The advantage

With production (Atlantic), drilling, blasting (MAS) and marine/earthworks (EMC) are aligned under one umbrella which allows clients to get single-point accountability, assured capacity and lower total delivery risk.

Recent Export Performance

Over 500,000 tonnes shipped in Prime Rocks' first year, supporting major regional infrastructure and marine projects. Regular sailings operate from Fujairah and Dibba to destinations across South Asia and the GCC.
